

# What is SoftWave Therapy?

SoftWave Therapy is an advanced, non-invasive, quick treatment that uses broad-focused acoustic waves to stimulate healing in your body. This effective technology is designed to treat pain, reduce swelling, and activate the body's natural repair processes.

## EFFECTIVE

SoftWave Therapy works at the cellular level, using highly effective shockwaves to stimulate repair, promote blood flow, and modulate inflammation. This powerful combination accelerates healing and provides lasting pain relief, helping you get back to what you love faster.

## RESEARCHED

SoftWave Therapy utilizes advanced shockwave technology, backed by FDA clearances and supported by extensive research, including ongoing and past studies.

## TRUSTED

SoftWave is used at leading national and international research and medical centers as well as professional sport organizations including: MLB, NFL, NBA, NHL, MLS, NCAA, PGA, USGA USATF, WNBA, Premier League, and UFC.

# Why Does it Work?

Works at a cellular level to spark the body's natural healing process

True Shockwave Device

Comfortable

## Changing lives one SoftWave at a time

# Benefits of SoftWave Therapy

- ✓ **Effective Pain Relief Targeting the Source**
- ✓ **Promotes Faster Healing**
- ✓ **Safe, Comfortable with Quick Treatments**
- ✓ **Suitable for Various Conditions**, Including Chronic Pain, Sports Injuries, and Musculoskeletal Issues
- ✓ **Non-invasive:** No Surgery, Needles, and **No Drugs**

“Treatment is so easy and it works! I was walking out of the clinic and realized I already felt better.”

“I had shoulder problems for years. Everyday activities like putting on my shirt gave me pain. After 4 short treatments, **I was pain free.** No more wincing and frustration!”

# What to Expect in a SoftWave Treatment

A gel is applied to the surface area to be treated. The applicator produces acoustic wave pulses as the clinician moves it around the treatment area. During therapy, the patient provides feedback to identify treatment areas and monitor progress.

Because SoftWave Therapy can decrease pain, increase blood supply, and activate connective tissue, it can be effective in reducing or managing the symptoms of:

- Back Pain
- Knee pain
- Shin Splints
- Plantar Fasciitis
- Jumper's Knee
- Stress fractures
- Overuse injuries
- Foot ulcer pain
- Non-Unions
- Shoulder Pain
- Scar tissue treatment
- Osgood-Schlatter
- Hamstring pain
- Elbow pain
- Fascial release
- Hallux Rigidus
- Achilles Tendinopathy
- Morton's Neuroma
- Acupuncture points
- and so much more.*

**I've battled chronic pain for years and tried countless treatments. SoftWave Therapy is the first to provide real, lasting relief. It's been life-changing!**

You don't have to accept  
*"This is just the way it is."*

Let the healing begin.
