

You can do something about it

Erectile dysfunction (ED) is more common than you may think, but it doesn't have to be your new normal.

SoftWave TRT presents a non-invasive, non-pharma solution, geared towards providing sustainable relief from ED and enhancing your overall sexual wellness.

Fostering spontaneous intimacy

It's time to leave behind the discomfort and awkwardness of penis pumps and unnecessary medications. Embrace a holistic, on-demand solution that integrates seamlessly into your lifestyle, fostering spontaneity, not anxiety.

You don't have to accept "This is just the way it is."

Let the healing begin.

Discover Freedom with SoftWave

Your Sustainable Solution to Erectile Dysfunction.

An alternative to an injection, surgery and medicine.

An option that heals.

SoftWave stimulates your body's own healing capabilities

Unlike traditional treatments such as medicines, injections, or even penile prostheses, SoftWave employs patented advanced technology to naturally improve erectile function. It boosts your body's blood supply and activates connective tissue to optimize performance, without the need for constant planning or fear of side effects that come with conventional treatments, like PDE5i medications.

What is SoftWave?

EFFECTIVE

SoftWave is a superior electrohydraulic Li-ESWT that has been proven to be effective and safe for patients suffering from men's sexual health conditions. The patented applicator generates energy wide and deep for predictable patient outcomes.

Non-invasive

No anesthesia or numbing creams needed

No side effects

Same day procedure

Long lasting

TRUSTED

Used at leading national and international research and medical centers

FDA 510(k) cleared for:

- Activation of connective tissue
- Improved blood supply

RESEARCHED

A preponderance of evidence continues to be published in academic journals worldwide documenting the efficacy and safety using Li-ESWT for vasculogenic ED
